

Release Notes

Wellness Platform — Admin & Registration

Version 2026.06.30 · Released June 30, 2026

Email templates now render exactly as designed and send from the support mailbox; appointments can be searched across all events and rescheduled to a different location; and the screener portal lists everyone registered the moment an event is selected.

NEW TOOLS

100%

DEPLOYED

EVENT MANAGEMENT · EMAIL TEMPLATES

1 · Email templates render exactly as designed

The template editor was rebuilt as a reliable **HTML source + live Preview** (the previous visual editor silently stripped email tables). A template's HTML is now sent as the **complete email** — no duplicated logo/details — so the confirmation email matches the template precisely. Placeholders (`{{first_name}}`, `{{event}}`, `{{location}}`, `{{date}}`, `{{time}}`, `{{manage_link}}`, ...) are filled at send time.

PUBLIC · MANAGE APPOINTMENT

2 · Reschedule to a different location

For multi-location events, the manage-appointment link now offers a **Location** selector during reschedule. Available dates and times follow the chosen location, capacity is checked there, and the appointment's location is updated on confirmation.

3 · Appointment Search (new)

A new **Appointment Search** page finds registered appointments across **all** events by **group, first name, last name, phone, or email** (combine any filters). Results show the group, event, location, date/time, contact info, and status, with a one-click **Resend** of the confirmation email.

NAME	GROUP	EVENT	DATE / TIME	STATUS
Walker, Bill	Leprino	West Coast Swing	Oct 13, 2026 · 1:00 PM	Registered
Curtis, Allison	Leprino	West Coast Swing	Oct 12, 2026 · 6:00 AM	Registered

Appointment Search across all events by group, name, phone, or email.

4 · Edit an appointment on behalf of a registrant

From **Appointment Search** (click a result) or an event's **Participants** list (new **Edit** button), staff open the appointment record and can update the registrant's name, email, phone, date of birth, gender, location, and status. The **date & time are chosen from real availability** — pick a location, then an open date, then an available time slot — and resend the confirmation.

5 · See everyone registered on event select

After a screener picks an event, the portal now **immediately lists every registered participant** (no search required); the search box filters that list live. The Screen action works for both pre-loaded participants and public appointment registrants.

6 · Pregnancy mode

Checking **Pregnant** on the screening form now grays out and excludes measurements that don't apply during pregnancy (anthropometrics & the full cholesterol panel). **Blood Pressure, Blood Glucose/HbA1c, Grip Strength**, and the **Lifestyle Risk Assessment** stay active and are the only values collected.

7 · Email now sends from support@myhealthyou.com

The outbound SMTP sending account was switched to **support@myhealthyou.com** (Microsoft 365), verified end-to-end.

SCREENER · RISK MODEL

8 · Risk scoring, critical logic & color categories

Each screening measure is now categorized  **green** /  **yellow** /  **red** using recognized guidelines (ACC/AHA, ADA, ATP III, WHO), with a **critical** flag for emergent values (e.g., BP $\geq 180/120$, glucose $\geq 300/<54$, LDL ≥ 190 , BMI ≥ 40). A composite **overall risk score** rolls these up to Low / Moderate / High / **Critical**. The results screen colors every tile, shows the score, and raises a **critical alert** listing the values needing immediate attention.

SCREENER & BRANDING

9 · Diabetic flag · 10 · White logo

Added a **Diabetic** checkbox beside Pregnant on the screening form (captured & stored). Refreshed branding: the **white HealthYou logo** now appears on the teal header across every page.

AUTOMATION · EMAIL

11 · Daily registration digest

A scheduled email (6:00 AM Mountain) summarizes the **prior day's** activity — new registrations (with counts **by group, event, and location**), plus that day's **reschedules** and **cancellations**. Each row has a **Review** → link that opens the appointment in the admin for editing. Based on the date the action occurred, not the appointment date.

Commits

today	latest	Daily registration digest email (counts by group/event/location + review links)
today	latest	Screening risk model: per-measure colors, critical logic, overall score
today	latest	Screeener: Diabetic checkbox; white logo on all headers
today	latest	Screeener: Pregnancy mode grays out non-applicable measurements
today	latest	Screeener portal: auto-list everyone registered for the selected event
today	latest	Admin: edit an appointment on behalf of the registrant (search result + Participants Edit button)
today	latest	Add Appointment Search under Event Management
today	latest	Manage appointment: choose a different location when rescheduling
today	latest	SMTP sender changed to support@myhealthyou.com
today	latest	Email templates: HTML-source editor; template HTML is the full email
