

Release Notes

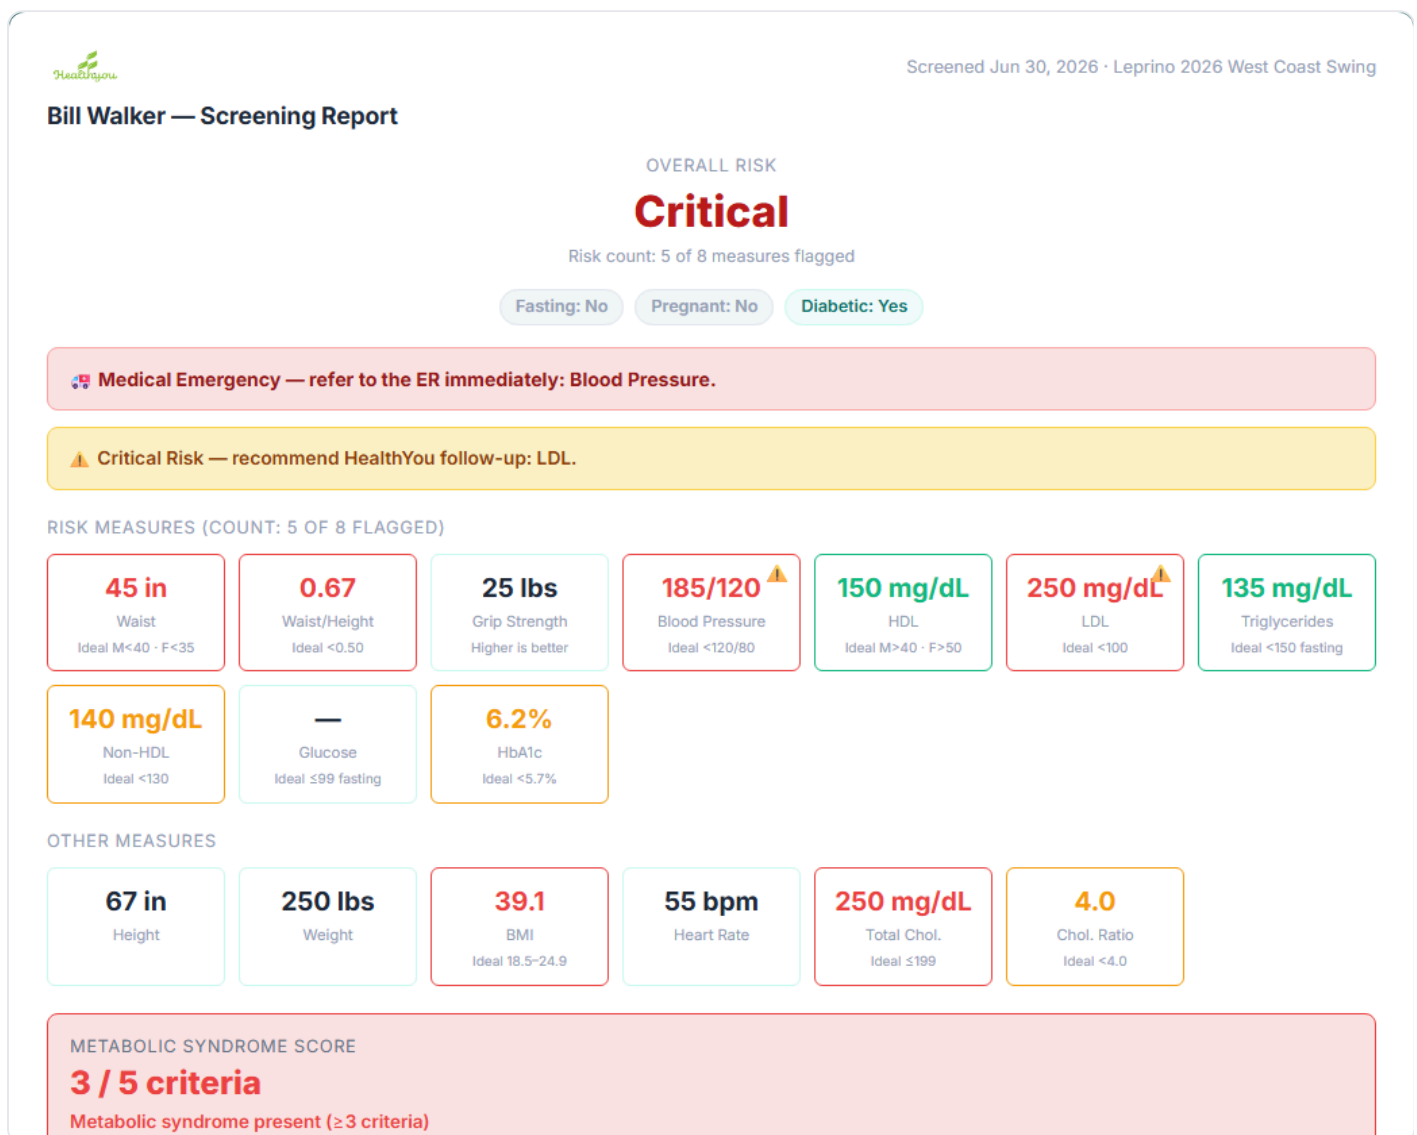

Version 2026.06.30

Released June 30, 2026

Screening report redesign with graphical ranges and Critical-Risk flags; an Emergent Risk follow-up form emailed to registrants; PCP events with 30-day scheduling and eligibility verification; a new User Management area; and richer group eligibility.

Screening Report & Results

- Screening Report redesigned — removed the Measure Summary and the “Understanding Your Results” panel; full-width layout.
- Every measure badge shows its Ideal range for quick comparison to the reading.
- New “Results vs. Ideal Ranges” graphic: each measure as a colored range bar with the result in a bubble/pointer, range-boundary notches, and a red Critical-Risk (CR) notch.
- Critical-Risk $\triangle$ indicator on the badge and graph for Blood Pressure, Glucose/HbA1c, LDL and Triglycerides when a reading is in the critical range.
- Lifestyle Risk Assessment always shown (— when unanswered); the full report (incl. graphs) also appears on the screener after entering results.
- Print / Save PDF outputs the report and the graphs, each on its own page.

Redesigned Screening Report — Ideal ranges on each badge, Critical-Risk $\triangle$ flags, and the Medical Emergency / Critical Risk banners

Emergent Risk Follow-up

- Screener “Save & Print Results” renamed to “Review Results.”
- When a Critical Risk or Metabolic Syndrome (≥ 3 criteria) is found, an Emergent Risk form appears: it lists the risks, asks whether a medical provider should follow up (with preferred days/times), requires acknowledgement, and emails a copy to the registrant.

The screenshot shows the HealthYou app interface. At the top, there's a dark green header with the HealthYou logo, "Demo Admin", "Screener", and "Log Out" buttons. Below the header, a user profile for "Bill Walker" is visible, including a "Back to Check-in" link, a profile picture with initials "BW", and personal information: "DOB: Mar 20, 1966 · Male · City of Colorado Springs".

The main content area is divided into sections: "ANTHROPOMETRICS", "FUNCTIONAL FITNESS", and "BLOOD PRESSURE & VITALS". The "ANTHROPOMETRICS" section shows fields for Sex (Male), Height (69 inches), Waist Circumference (36 inches), and Weight (240 lbs). The "FUNCTIONAL FITNESS" section shows Grip Strength (125 lbs). The "BLOOD PRESSURE & VITALS" section shows Systolic BP (120 mmHg), Diastolic BP (80 mmHg), and Heart Rate (3 / 10 bpm).

An "Emergent Risk — Follow-up Form" modal is displayed in the center. It has a red header with a warning icon. The text reads: "An emergent risk has been identified:" followed by a list of risks: "HbA1c — Medical Emergency (ER referral)", "LDL — Critical Risk", and "Metabolic Syndrome — 3 of 5 criteria (higher risk)". Below this, it asks: "Would you like a medical provider to reach out to you for a follow-up appointment regarding your risk(s)?" with radio buttons for "Yes" and "No". There is also a checkbox for acknowledgment: "I acknowledge that an emergent risk was identified and reviewed with me, and that a copy of this form will be emailed to me. This is not a diagnosis; I should follow up with a medical provider." At the bottom of the modal are "Close" and "Acknowledge & Email Form" buttons.

Emergent Risk follow-up form — acknowledged and emailed to the registrant

Events & Registration

- New PCP event type; the Leprino PCP event set to PCP.
- PCP registration links only allow scheduling within the next 30 days.
- Event setup flags: “Requires eligibility verification” (on by default) and “Flu shots offered.”
- Registration verifies eligibility by last name, first name, DOB and gender against the iStrata eligibility file (Active); ineligible registrants get a formatted message and the registration ends.
- Flu-shot question added to registration when the event offers it.
- Screener portal lists split into Registered vs Completed (grouped by location); completed screenings can be reopened to view/edit.
- Recent Screenings: Edit opens the screening entry to update values. Participants: Add Screening opens the screening form; attach documents (PCP results / blood work) to a screening record.

Admin & Settings

- New Settings → User Management (replaces System Settings): add users with a role (Admin / User / Health Coach), assign left-nav categories, grant Health Coach & Screener portal access, and set a password.
- Group eligibility list: filter by Account Status and Department/Location (pick lists), plus DOB & Gender columns.
- Leprino & City of Colorado Springs eligibility now resolves (group-code fix). Log Out button made clearly visible across all portals.
