

Release Notes

Wellness Platform — Admin & Registration

Version 2026.06.29 · Released June 29, 2026

This release groups the Event Management tooling under a clearer navigation, adds a reusable Forms and Email Templates system with rich-text editing, introduces event types with list filtering, wires employer-group eligibility live to iStrata, expands registration to capture date of birth & gender, and adds an in-app Release Notes page. All changes below were committed and deployed to production (Netlify) on the date above.

DEPLOYED

NAVIGATION

1 • Left navigation restructured

The sidebar was reorganized for clarity: **Groups** moved under **Admin Portal**; a new **Health Coaching Admin** group holds Participants & Coaches; the old **Users** group was removed; **Communication** was renamed **Wellness Portal**; and a new **Email Templates** entry sits under **Event Management**.

The restructured sidebar (now including Settings → Release Notes).

2 · Forms builder — rich text + acknowledgement

The form builder gained a WYSIWYG **Content** body (bold, headings, lists, links) shown above the fields, plus a **Type** selector: **Information only** or **Acknowledgement required** (the participant must tick an acknowledgement box during registration).

The screenshot shows a form editor interface with the following components:

- Form Name ***: A text input field containing "Leprino Consent".
- Type**: A dropdown menu with "Acknowledgement required" selected.
- Status**: A dropdown menu with "Active" selected.
- Content**: A rich-text editor toolbar with buttons for Bold (B), Italic (I), Underline (U), Heading (H), List (• List), and Link (Link icon). Below the toolbar is a text area containing the text: "I acknowledge that the biometric screening is voluntary and consent to participate..."

Form editor with the rich-text content toolbar and Type selector.

3 · Email Templates (new)

A new reusable confirmation-email system. Templates have a subject and a rich body with a **Visual / HTML / Preview** toggle. Each event selects a template on its Email tab; the registration confirmation email is built from it.

TEMPLATE	SUBJECT	STATUS
Standard confirmation	Your screening appointment — {{date}}	Active
Flu clinic reminder	Your flu shot — {{date}}	Active

Body

VisualHTMLPreview

Hi {{first_name}}, your appointment for {{event}} is confirmed for {{date}} at {{time}}.

Email Templates list and the body editor with Visual / HTML / Preview modes.

4 · Event Type field & list filters

Events now carry an extensible **Event Type** (Screening Event, Flu Clinic, Lunch & Learn — new types can be added on the fly). The main list shows a Type column and gained filters for **Event Type** and a **start-date range**.

Event TypeStart date fromStart date to

All types

mm/dd/yyyy

mm/dd/yyyy

Clear

EVENT	TYPE	DATES	GROUP	STATUS
Leprino 2026 West Coast Swing	Screening Event	Oct 8 – Oct 29, 2026	Leprino	Scheduled
Fall Flu Clinic	Flu Clinic	Nov 3, 2026	Goodwill	Scheduled

Events list with the Type column and the type + date-range filter bar.

5 · Form assignment per event

An event's **Forms** tab was rebuilt: a + **Add Form** button opens a picker of all available forms (checkboxes); selected forms appear in a table with per-row **Remove**. Add/remove auto-saves.

Registration Forms (1)

+ Add Form

FORM	FIELDS	TYPE	
Leprino Consent	1	Acknowledgement	Remove

The rebuilt Forms tab: assigned forms table with the Add Form picker.

GROUPS

6 • Group eligibility live from iStrata

A group's **Eligibility** tab now reads live, read-only data from `iStrata.dbo.vw_full_eligibility` (matched by Group ID) instead of the empty local upload table. Search, pagination, and active/terminated stats are driven from iStrata.

 Eligibility is sourced live from **iStrata** (`vw_full_eligibility`) and matched to this group by Group ID. It is read-only here.

EMP ID	NAME	EMAIL	STATUS
20440	Aaron, Stephanie	stephanie.aaron@d11.org	Active
31261	Abbott, Melinda	melinda.abbott@d11.org	Active

Group Eligibility tab now sourced from the iStrata view (sample: D11 School District).

PUBLIC REGISTRATION

7 • Registration skips the Forms step when none

If an event has no assigned forms, the public registration wizard now omits the **Forms** step entirely, moving the registrant straight from **Details** to **Review**.

1. Location

2. Date & Time

3. Details

Forms

4. Confirm

The Forms step is dropped from the stepper when an event has no forms.

UI FIX

8 • Events page alignment corrected

A stray wrapper on the Events page was centering all content (headers, tables) and adding extra top padding. It was removed so the page is properly left-justified and consistent with the rest of the admin app.

9 • Date of Birth & Gender + cleaner validation

The registration **Details** step now captures **Date of Birth** and **Gender** (both required, stored on the appointment and shown on Review). The "please complete" notice was also fixed so a long consent form can no longer fill the screen — long labels are truncated and the toast is size-capped.

Registration Details step with Date of Birth and Gender.

SETTINGS

10 • Release Notes page

A new **Settings** → **Release Notes** page lists each platform release with its version date, a summary, highlights, and a downloadable PDF (this document) with an inline preview — so the team has an in-app version history.

Version 2026.06.29

Latest

Released June 29, 2026

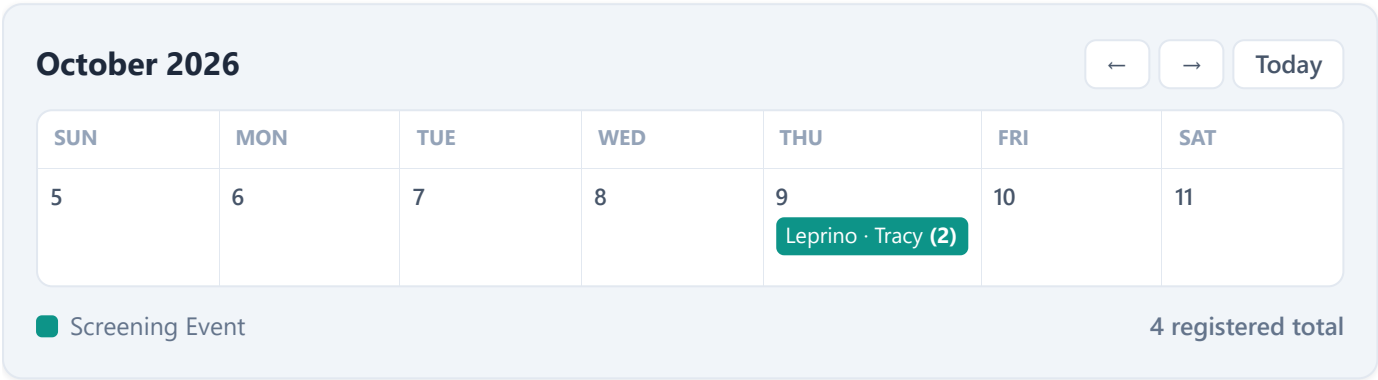

View PDF

Download PDF

The new Release Notes page under Settings.

11 · Event Calendar (new)

A new **Event Management** → **Calendar** page plots **registered appointments** on a month grid by appointment date, color-coded by event type, with month navigation, a "Today" jump, and a type legend. Each entry shows the **location** and the **number registered**; days and events with no registered participants are hidden, and a running total is shown. Chips link straight to the Events page.

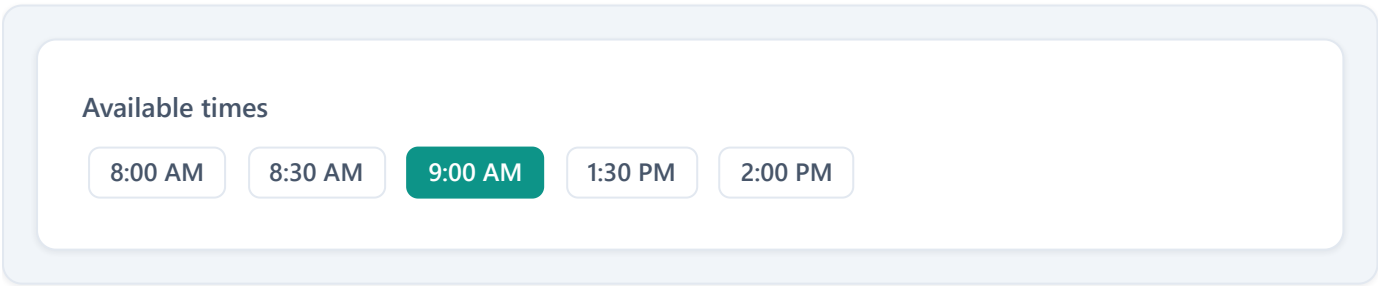

The new Event Calendar — all events on a month grid, colored by type.

PUBLIC REGISTRATION

12 · Appointment times in AM/PM

Appointment times now display in standard 12-hour format with AM/PM across the registration time-slot picker, the review screen, the confirmation email, and the manage/reschedule page (e.g. **13:30** → **1:30 PM**). The stored value remains 24-hour, so scheduling logic is unchanged.

Time slots shown in standard AM/PM format.

13 · Email delivery via SMTP (Microsoft 365)

Outbound email (registration confirmations, coaching-session confirmations, coach welcome) now sends through an authenticated **SMTP** connection from **wellness@myhealthyou.com** (Microsoft 365), via a shared mailer with an automatic fallback to the previous provider. Credentials are stored as server environment variables, never in code.

 Sending as **HealthYou <wellness@myhealthyou.com>** over **smtp.office365.com:587** (STARTTLS) — authentication verified.

All platform emails now originate from the HealthYou mailbox.

14 · Resend confirmation from the registrants list

Each registrant in an event's **Participants** list now has a **Resend** button that re-sends that event's assigned confirmation email (built from the event's email template) to the registrant — handy if the original was missed or details changed.

NAME	EMAIL	STATUS	
Doe, Jane Oct 9, 2026 · 9:00 AM	jane.doe@example.com	Registered	Resend

Per-registrant Resend on the event Participants list.

Featured commits (this release)

22:0x	latest	Email via SMTP (Microsoft 365); Resend confirmation button on event registrants list
21:4x	latest	Calendar: show registered count + location per date; hide events/dates with no registrations
21:1x	latest	Registration times to AM/PM; add Event Management Calendar (month view)
20:3x	data	Leprino Consent form: tidy pasted HTML (semantic list/paragraphs, linked privacy notice; wording unchanged)
20:24	0c94298	Registration: capture Date of Birth + Gender; fix oversized validation toast
19:55	8b7535f	Add Release Notes page under Settings with downloadable PDF
19:38	866c6b9	Event Forms tab: add-form picker modal + assigned-forms table
19:33	d347f37	Event Forms tab: fix checkbox layout, clean multi-select list
19:26	08f3c7a	Events page: remove stray wrapper that center-aligned content
19:20	e5c5d67	Events list: Event Type column + type & start-date filters
18:37	89e93ab	Groups: source eligibility live from iStrata vw_full_eligibility
18:29	9db6bc5	Events: extensible Event Type; registration skips empty Forms step
18:16	02626eb	Email Templates: move under Event Management + Visual/HTML/Preview
18:12	f5b7d59	Emails: reusable email templates + event template selector
18:05	5c28def	Forms: WYSIWYG HTML body + acknowledgement vs information-only flag
17:52	193fd4c	Left nav restructure (Groups, Health Coaching Admin, Wellness Portal)
